

FROM ENERGY COMPLEXITY TO CONTROL

EXPERIENCE, NEXT-GENERATION TECHNOLOGY & SUSTAINABILITY

Integrated Energy Ecosystem

A coordinated platform connecting analysis, strategy, implementation and optimization.

Core positioning

Voltika Group addresses a dynamic, technical and interconnected energy market through specialized companies with clear roles and a shared execution framework.

Strategic outcome: better control, higher predictability and value creation across the energy transition.

Market Operations

Supply, trading, balancing, forecasting, PPA and B2B/B2C energy solutions.

Technical Execution

Design, EPC, project management, O&M, asset management and optimization.

Infrastructure Platform

PV/BESS, utility-scale assets, EPC financing and strategic partnerships.

Partner Value

Tailored solutions for producers, corporate consumers, investors and developers.

From separate energy services to one integrated delivery model.

Group Architecture & Strategic Roles

Each company contributes a distinct capability to one shared energy platform.

Voltika Energy România

Supply, trading and energy optimization for companies and end-clients.

- Power supply
- Trading & procurement
- Balancing & forecasting
- PPA structures

Voltika Systems

Technical company focused on PV/BESS performance and long-term energy autonomy.

- Design & consulting
- EPC delivery
- Project & asset management
- O&M and optimization

Voltika DX Infra

Development, structuring and financing for scalable energy infrastructure.

- EPC financing
- Project development
- Own investments
- PV/BESS utility scale

Voltika Energy Moldova

Regional B2B energy solutions adapted to local market dynamics.

- Energy supply
- Gas supply
- Trading & procurement
- B2B solutions

Supply & Trading

Electricity and gas supply, trading and procurement capabilities designed for flexible and transparent market access.

Forecasting & Balancing

Production forecasting, dispatching and balancing support to improve exposure management and operational predictability.

PPA & BESS Structures

Long-term contracting, PPA structuring and tolling / BESS processing models for differentiated market participation.

B2B / B2C Solutions

Tailored supply and energy management solutions adapted to corporate, prosumer and end-client consumption profiles.

Convert energy volatility into managed cost, market access and partner value.

Technical Delivery: PV/BESS Execution Platform

01

**Design &
Consulting**

We assess feasibility, define the technical concept and prepare projects for safe, efficient execution.

02

**EPC
Delivery**

We deliver turnkey PV/BESS implementation through engineering, procurement, construction and commissioning.

03

**Project
Management**

We control scope, schedule, budget, contractors and risks to keep delivery predictable and accountable.

04

**Asset &
O&M**

We monitor, maintain and optimize assets to protect performance, availability and long-term value.

PV/BESS delivery with performance evaluation, optimization and long-term operational accountability.

VOLTIKA DX INFRA

Infrastructure & Investment Capability

Bankable project structuring

EPC financing, project development and own investments create a stronger bridge between technical execution and investment readiness.

Core focus:
scalable PV/BESS infrastructure with clear partnership logic.

◆ EPC Financing

Capital structure support for execution-ready projects.

◎ Utility-scale PV/BESS

Infrastructure assets designed for market relevance and grid flexibility.

⚡ Project Development

From opportunity mapping to delivery coordination.

↗ Investors & Developers

Partnership models built around transparency and performance.

Infrastructure. Financing. Partnerships. Investment-grade execution.

Market Operations

Supply, trading, forecasting, balancing and PPA structuring designed to improve cost control, market access and risk visibility.

Technical Delivery

EPC, PV/BESS integration, project management, asset management and O&M under one coordinated execution framework.

Infrastructure & Investment

Project development, EPC financing, own investments, utility-scale PV/BESS and strategic partnerships for scalable energy assets.

Client & Partner Value

Tailored solutions for producers, corporate consumers, investors and developers, built around predictability, transparency and long-term performance.
